

BellaTrove®

**Companion Maxx® WP**

*STIMULATE YOUR PLANTS NATURAL DEFENCES*

## Description

A proprietary OMRI listed, BioFungicide for Soil and Foliar applications offering three modes of action to protect against disease and abiotic stress.

## Benefits

**BROAD SPECTRUM PROTECTION ON SOIL-BORNE DISEASES & LESION NAMATODES**

**BROADLY COMPATIBLE WITH SYNTHETIC CHEMISTRY**

**STIMULATES PLANTS NATURAL DEFENSES**

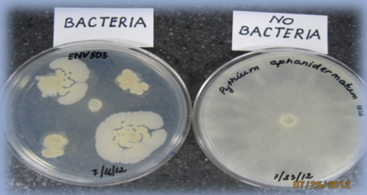

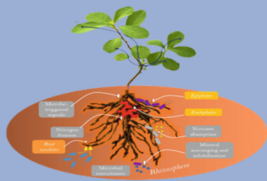

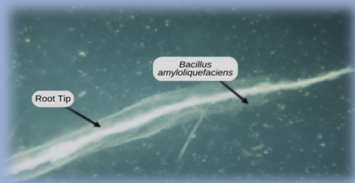

**PROMOTES PLANT GROWTH AND OVERALL YIELD**

## Features

- EPA Registered Active Ingredient – Broad Spectrum strain ENV503 *Bacillus amyloliquefaciens*
- Low use rate that is compatible with multiple technologies
- OMRI Listed and is suitable for both organic and conventional production.
  - BioControl & BioStimulant in one formulation
- Three Modes of Action providing more control and less pesticidal resistance
  - Best in class strain selected for its fungicidal properties

# 3 Modes of Action

## Companion Maxx WP - MOA

- 1 Forms a protective barrier around the roots, protecting them from invading pathogens  
 Colonization
  - Root
  - Seed
- 2 Known to trigger the plant's immune system (ISR) to more effectively combat stress
- 3 Produces metabolites that prevent the growth and has an antagonistic effect on soilborne pathogens

## Fungal - Bacterial Disease Control

Bella Trove Companion Maxx WP offers broad spectrum disease control of both fungal and bacterial pathogens. It addresses more than three dozen common diseases including:

### Damping-off fungus

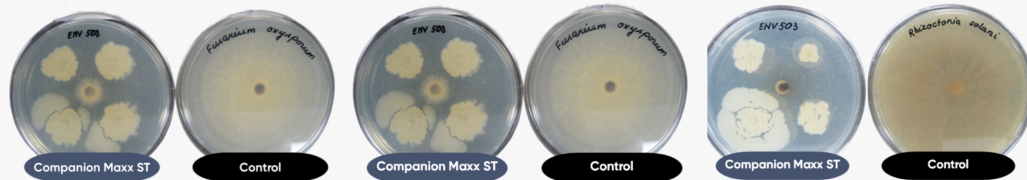

- Rhizoctonia spp.
- Pythium spp.

### Fusarium seedling blight

- Fusarium spp.

## Soilborne Disease control

### Suppression of Fungal Colonies through Metabolites Produced

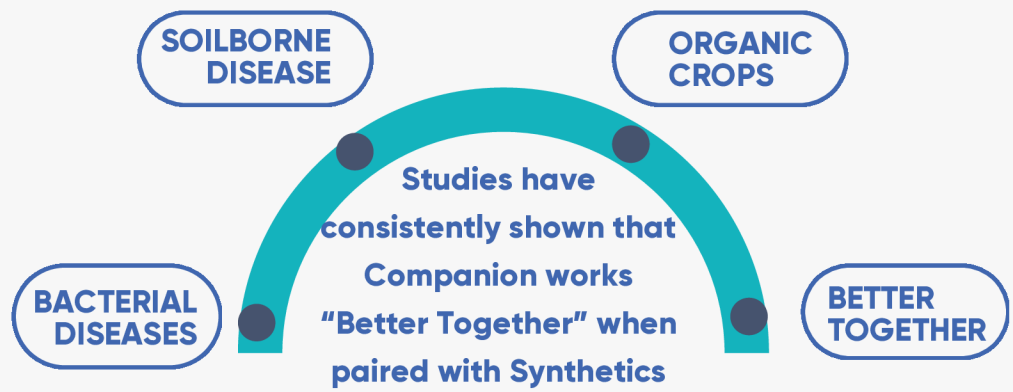

Pythium

48%  
Incr.

Fusarium

Rhizoctonia

## Target Areas

**STIMULATE YOUR PLANTS NATURAL DEFENSES**
